

Keeping it Clean Since 1934

ABOUT US

Niagara Systems, a South Shore Controls, Inc. company, designs and manufactures industrial washing systems. Founded in 1934, Niagara Systems has set the benchmark for high-quality, long-lasting industrial washers and dryers, from small cabinet style machines to large belt and carousel style systems.

We are experts at cleaning and drying complex, tough to clean parts such as castings, bottles, totes, and cylinders. Parts with small, deep internal passages are our specialty. We offer both standard washing systems and highly-engineered custom systems that remove chemicals, soils, films, and debris to meet your exact cleanliness specifications.

Niagara Systems are made in America, but we sell and service our equipment worldwide.

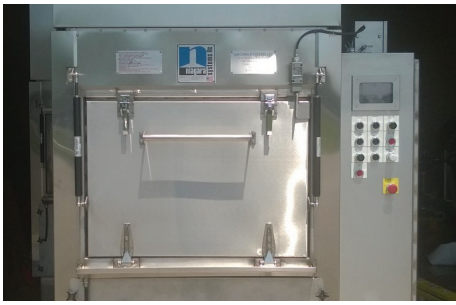

We manufacture a full line of world-class washing systems in our state-of-the-art factory in Mentor, Ohio. Our team of mechanical, electrical, and controls engineers work with experienced and dedicated master craftsmen to build beautifully finished, long-lasting, superior quality machines. Every machine is thoroughly tested before they are painstakingly packaged and shipped to their final destination. Once on site, our installation crew assures your machine is set-up and working to your complete satisfaction.

Of course, aftermarket service and support are critical to your business. We can provide remote access to your machine's control so diagnostics or changes to your product's washing needs can be quickly incorporated. We design and build components in-house, so replacement parts can be provided quickly.

Our industry experience includes cleaning systems for automotive, aerospace, agricultural and construction equipment, ammunition, firearms, cookware, hardware, fasteners, commercial product parts, stampings, castings, screw machine parts, and additive manufacturing parts.

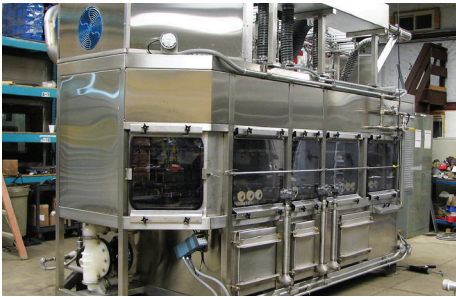

For more than 80 years, Niagara Systems has been the worldwide **Industrial Washing System Experts.**

CABINET WASHER

Machine is perfect for lower volume, batch production

- Oil sample bottles
- Labware
- Animal cages
- Multiport castings

CAROUSEL WASHER

Machine is best suited for medium volume production with one operator

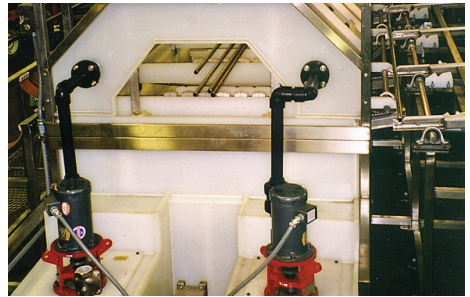

- Pistons
- Crankshafts
- Bottles
- Ordinances

TUNNEL WASHER

Machine is the best choice for high volume production and perfect for integration in a production line

- Gaskets
- Cylinders
- Casting/machined parts
- Bottles

SPECIAL WASHERS

Custom designed, purpose built for unique applications

- Electrical cabinets
- Flat Glass
- Sharps containers
- Caskets

NIAGARA SYSTEMS DELIVERS

- **Flexibility** - Reduced foot print and a flexible control that solves challenging application and installation problems.
- **Productivity** – Design for efficiency minimizes washing and drying cycle times, saving time and money while meeting or exceeding customers' cleanliness specifications.
- **Sustainability** - Ingenious machine architecture reduces water and electricity consumption and saves critical floor space.
- **Easy to Use** - Easy-to-program control and large glass observation windows facilitate operation and cycle monitoring.
- **Durability** – Designed and built in America to provide years of trouble-free service. Set it in place, turn it on, and forget it.
- **Safety** – Redundant safety logic keeps operators safe. Operator protection is our number one design priority.
