Specific Questions of Desired Washer:

What is being washed?

What is the size and dimensions of the parts? Pictures, drawings, sample would be helpful.

How many items per hour are washed? If there are different sizes, what is the mix per hour?

What is being removed from the parts? Machining lubricants, chips, chemicals, etc.

Are the parts new, or are they returned from the customer?

What is the cleanliness specification? Particulate? Surface Tension?

What types of soaps, acids, or chemicals are utilized during your cleaning process?

Do the parts need to be sanitized? Sterilized?

Do the parts need to be dry? If so, how dry?

Once the parts leave the washer, what is the next operation?

Is the wash process manual or automatic?

What utilities are available? What is the available amp draw?

What type of heat source is available and what is your preference? Gas, Steam, Electric

What is the desired footprint of the washer? How much space is available?

What are the federal or international standards that are required? (i.e. UL, CE, etc.)

What is the desired timeline for the washer?

Your responses to the above questions will help us provide the most accurate quote for the requested washer. If there is any need for questions or clarifications, please feel to contact us at any time.

Thank you again for contacting Niagara. We look forward to hearing from you.

Best regards,
